## **PITSID at the DRUPA 2008**

PTISID Polygraphische innovative Technik Leipzig GmbH will exhibit at the DRUPA 2008 in Hall 16.

At stand no. 16D77 we inform you about the wide range of special equipment for the graphic industry.

Our main focus will lie on our Automatic Plate Punch APP which works until now with unequalled accuracy.

Our successful Packing Gauge, Contact Pressure Tester, IPA Measuring Device II, Product Control System and the new Register Measuring System LUCHS III will be prioritised at our DRUPA presentation.

Of course PITSID will introduce new products at the DRUPA as well. Visitors will get to see measurement and checking devices for the measurement of U.V. curing, for evaluation of roller pressing and gab measures between cylinders.

Further the Saxon Institute of the Printing Industry will be represented at the stand and will inform you about current research results, services and the annual revised edition of the Handbook "Printing and Advertising".

Stand at the same place as last time (DRUPA 2004) - hall 16 stand 16 / D77
